

Dear Sirs:

I despair for our country when the very institution that has been created to protect the people from such exploitation of accumulated power does not do it's job. Clearly Sinclair Broadcasting's decision to force their stations to air an anti-Kerry documentary at this point in our political process violates the public interest as well as their contract to use the air waves respecting the public interest. Their argument that the documentary is 'news' is a blatantly fraudulent one that insults the intelligence of the American people.

Why is the FCC not doing its job? In whom can the American people trust? Where is the application of the principles of democracy? How can we consider exporting 'democracy' when we no longer seem to be one?

I urge you to rein in this misuse of the public trust in which Sinclair is involved. Please be the advocate for the people for which you were created .

Thank you.

Susan Harris
